Date available to begin work: Immediately

SUMMARY STATEMENT

Detail-oriented cybersecurity professional with hands-on experience conducting forensic examinations, analysis, and investigations in a prosecutorial environment. Proficient in multiple advanced security tools including Ghidra, Wireshark, and Cellebrite, with foundational knowledge across multiple operating systems. Demonstrated ability to lead and collaborate effectively. Recognized for academic excellence and commitment to the field, holding NSA Cyber Operations Designation and multiple honors for scholarship and service.

PROFESSIONAL SKILLS

Education	Bachelor of Science in Cybersecurity & Networks from the University of New Haven.
Employment	Proficient in conducting forensic examinations of digital devices supporting active criminal investigations, with experience preparing legal documentation including subpoenas, consent forms, and search warrants. Skilled in OSINT gathering and suspect identification techniques, as well as establishing and monitoring surveillance such as pole cameras and wiretaps.
Personal	Capable in providing strong leadership and team management with proven ability to communicate effectively and foster collaboration. Committed to continuous learning of new technologies, investigative methods, and professional development.

PROFESSIONAL WORK EXPERIENCE

Cyber Crimes/High-Tech Intern, May 2024 – August 2024

Union County Prosecutors Office, Elizabeth, NJ

Salary: Unpaid

Job Type: 40 hours per week, Full-Time

Supervisor: Paul Marinaccio, (973) 979-9020

- Conduct forensic examinations on devices related to ongoing criminal investigations and recognize crime patterns.
- Adhere to structured investigative methods and maintain the proper chain-of-custody of evidence.
- Trained in the production and certification of legal documentations in the form of subpoenas, consent forms, search warrants.
- Contribute to investigations involving theft, distribution/possession of child exploitation images (NCMEC), and identity theft.
- Trained in the use of computer forensics and high-tech investigative tools.
- Collaborated with Assistant Prosecutor's on locating, collecting, developing, and evaluating evidence in ongoing investigations.
- Establish methods of surveillance & communication throughout the county (pole cameras, wiretaps).
- Performed over 50 rudimentary analyses on suspect identification using OSINT techniques such as Overpass Turbo, social media, and phonebooks.
- Attend initiatives to enhance knowledge and experience in law enforcement techniques and operations such as interview, K-9, and drone.
- Attend ride-alongs and statistic meetings with agency leadership to learn about county history and recognize potential hotspots for crime.
- Engage in community outreach endeavors to provide assistance and services to individuals suffering from substance abuse.
